

Mohamed ZiedJabeur

FULL-STACK DEVELOPER SOFTWARE ENGINEERING STUDENT

Software Engineering student with a strong background in Full-Stack Development and hands-on experience building web, mobile, and AI-powered applications. Ranked first in university and awarded Best Final Year Project (19.5/20). Skilled in Java, Spring Boot, Angular, React, and modern software development practices, with a passion for creating innovative and impactful solutions.

EDUCATION

- 2028
Software Engineering Degree
ISIMS
- 2025
License in Information Systems Development
ISET Tataouine
- 2024
Full-Stack Development Certification
GoMyCode
- 2022
Bachelor of science
Tataouine High School

SKILLS

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, Python, C#, C++, PHP, SQL
- **Web & Backend:** HTML5, CSS3, React.js, Angular, Node.js, Express.js, Spring Boot, Spring Security, Spring Data JPA, RESTful APIs
- **Mobile:** Android Development (Java, Android Studio), React Native
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase Realtime Database, Firestore Database, Firestore
- **Tools & Methodologies:** Git, GitHub, Postman, Maven, Agile (Scrum/Kanban), JWT Authentication, Web Security, OOP, MVC Architecture, AI Integration

Creative Skills

- Video Editing
- Image Editing
- UI/UX Design

PROFESSIONAL EXPERIENCE

Technician internship

ABBK PHYSYSWORKS | JANUARY 2024 - FEBRUARY 2024

- Developed an event organizer web application, allowing users to create, manage, and participate in events through a streamlined online platform.
- Built the application using React.js, Node.js, and MongoDB, focusing on user experience and efficient data handling.

Technician internship

ABBK PHYSYSWORKS | JULY 2024 - AUGUST 2024

- Contributed to LiveDocs, a real-time collaborative application for co-authoring and managing documents.
- Implemented features for simultaneous editing, document sharing, and live commenting, using Node.js, React.js, MongoDB, and WebSockets.

Software Development Intern

HELLO DATA | JANUARY 2025 - JUNE 2025

- Developed LocaStore, a web-based marketplace for ISET Tataouine's Applied License, awarded Best PFE (19.5/20) and Best FYP university-wide
- Built a full-stack MERN (MongoDB, Express.js, React.js, Node.js) platform to connect residents with local businesses, implementing user authentication, product/service management, and order tracking
- Integrated AI-driven features, including comment filtering to prevent toxicity and auto-generated product/service descriptions to enhance customer engagement
- Developed receipt generation and auto-email functionalities to streamline transactions and user communication
- Applied Agile methodologies (Scrum, Kanban) under Mr. Younes Refis (Technical Supervisor) and Mrs. Sawsen Tlahig (Academic Supervisor)

PROJECTS :

Hospital Management System - Desktop Application

- Developed a Java-based desktop app to manage patient registration, appointments, and medical records.
- Integrated SQL database for efficient data storage and retrieval with a focus on scalability.
- Designed an intuitive UI using Java Swing to enhance usability for hospital staff.

GRADE

- Ranked top of the IT department twice, in 2022/2023 and 2023/2024. (Very Good Honors)
- Ranked 1st across the entire university in 2024/2025. (Excellent Honors)
- Awarded Best Final Year Project (FYP) at the university

LANGUAGES

- Arabic: Native
- English: Fluent
- French: C1 (TCF)

University Management System – Desktop Application

- Built a C# desktop app using XAML and XML for student enrollment, course scheduling, and faculty records.
- Implemented secure authentication and role-based access with MVVM architecture for modularity.
- Utilized XML for data serialization to ensure flexible and maintainable data handling.

Food-Ordering Web and Mobile Application – MERN Stack

- Created a MERN stack web and React Native mobile app for food ordering with order tracking and payments.
- Integrated Firebase for real-time updates, Google Authentication, and Firestore for data management.
- Developed REST APIs and AI-driven recommendation features to enhance user experience.

Gym Management System – Web Application

- Designed a MERN stack web app to manage gym subscriptions, client profiles, and performance analytics.
- Implemented REST APIs for authentication and subscription tracking with a responsive React.js interface.
- Applied Agile methodologies to ensure iterative development and timely project delivery.

FORMATION

Full-Stack Development Certification

- Proficient in MERN stack (MongoDB, Express, React, Node.js).
- Developed RESTful APIs, user authentication, and frontend-backend integration.
- Hands-on experience with databases, server scripting, and frontend projects.

EXPERIENCE AND ACHIEVEMENTS

- Nefsawa Hackathon: Team ranked 4th, showcasing problem-solving and technological innovation skills.
- Active Member - Robotics Club: Contributed to robotic development projects and interdisciplinary collaboration.
- President and Active Member - Computer Science Club: Organized workshops and participated in software development projects.

INTEREST

- Artificial Intelligence and Machine Learning: Exploring AI-driven solutions like comment filtering and automated content generation, inspired by LocaStore project development
- Open-Source Development: Contributing to web development projects and experimenting with MERN stack frameworks on GitHub
- Competitive Programming: Participating in coding challenges to enhance problem-solving and algorithmic skills
- Fitness and Gym Training: Practicing strength training and cardio to maintain discipline and physical well-being, inspired by developing a Gym Management System
